# TO DO LIST APP

FEEDBACKS:

- **Alignment Issue:** The "TO DO LIST APP" title overlaps awkwardly; should be properly centered or moved above the screens.

- **Text Update Needed:** Text like "TO DO LIST" on multiple screens should be customized per screen (e.g., "Today's Tasks", "Task Details", etc.).

- **Empty Space:** Lot of white space around; could tighten margins or add background color to screens.

- **Icon Upgrade:** Placeholder images could be replaced with real icons (e.g., bank logo if converted to a banking app).

- **Font Uniformity:** Text fonts and sizes should be uniform across all screens for professionalism.

- **List Customization:** All task lists show "Today" — could add variety like "Tomorrow" or "Upcoming" for realism.
- **More Icons:** Settings screen could use small icons next to options to make it even more intuitive.
- **Typography Touch:** Differentiate slightly between headings and options (maybe make headings bolder).
- **More Color Accent:** Using a secondary accent color (besides blue) for important buttons (like "Important") could improve visual richness.
